Premium Water for Pets

Posted Jun 16th 2006 2:02PM by [Nicole Weston](#)

Filed under: [Pets](#)

There are scores of flavored waters for human consumption, but until now, marketers have been cutting a whole potential audience out of the flavored-water market: pets. [Mollibrands, Inc.](#)

has just introduced a line of premium waters specifically designed for pets. The Molli's Choice Waters have no chlorine or flourine, unlike most tap waters, and have taurine and calcium added to them. They are

available unflavored, as well as in a selection of "delicately flavored" versions, customized for the palates of dogs or cats. The dog flavors include original (Unflavored), Beef Tenderloin, Bacon Delight, Roasted Turkey and Roasted Chicken. The cat flavors include original (Unflavored), Roasted Turkey, Roasted Chicken, Beef Tenderloin.
